About the Minnesota Council on Foundations

The Minnesota Council on Foundations, a regional association of grantmakers, works actively to strengthen and expand philanthropy. MCF members represent three-quarters of all grantmaking in the state, awarding more than \$850 million to nonprofits annually. Members include family and private independent foundations, community and other public foundations, and corporate foundations and giving programs. For more information, visit www.mcf.org.

Foreword

Dear Friends and Colleagues:

The Minnesota Council on Foundations (MCF) presents the 2009 edition of *Giving in Minnesota*. This report, produced annually, provides the most comprehensive analysis of charitable giving in the state. It also demonstrates the commitment of our member grantmakers to be valuable partners with nonprofits in meeting community needs, and to be open and accessible in their work as funders.

The 2009 edition features information on overall giving in 2007 (the most recent time period for which complete data are available), as well as specific grantmaking trends by 100 of the largest Minnesota grantmakers. Although they represent just 7 percent of all grantmakers in Minnesota, these 100 accounted for approximately 82 percent of all grant dollars paid in the state in 2007.

MCF thanks the many individuals and organizations that helped make this report possible: the Minnesota Attorney General's Office Charities Division for providing public data on charitable giving; MCF members for providing grantmaking data; and MCF staff and consultants for data collection and coding, analysis, and report writing and production.

We hope you will find the information presented here useful in your work. The Minnesota Council on Foundations has been collecting and analyzing information on Minnesota grantmaking for more than 30 years. *Giving in Minnesota* derives from our goal to provide the most current, accurate and reliable information on grantmaking in the state. We encourage you to visit our website at www.mcf.org for information about MCF's other grantmaking resources.

Sincerely,

William R. King
President

Minnesota Council on Foundations

Introduction

Giving in Minnesota, a report produced by the Minnesota Council on Foundations (MCF) since 1976 (and produced annually since 1997), provides a comprehensive analysis of the trends and patterns of giving by organized philanthropy in the state. The report is intended to present the scope of philanthropy in Minnesota to a diverse audience, including nonprofits, the news media, public officials and the general public, as well as to foundations and corporate giving programs.

Giving in Minnesota, 2009 Edition, describes Minnesota grantmaking trends and patterns for the year 2007, which MCF defines as the fiscal year of any Minnesota foundation or corporate giving program that ends between June 1, 2007, and May 31, 2008. This is the most recent period for which comprehensive data are available. Because all grantmakers do not use the same fiscal year, and because foundations are allowed several months to file an IRS 990 or 990-PF tax return, there is some lag time before data are available to MCF for analysis.

There are two major sections of this report. The first section – Minnesota Giving Overview – provides information on total domestic and international giving by all Minnesota foundations and corporations, as well as giving by individual Minnesotans. The second and larger section of the report – Giving in Minnesota Sample Trends – includes an in-depth analysis of giving patterns and trends by 100 of the largest grantmakers in Minnesota, by grants paid, for which MCF could obtain data (see Appendix i for the complete list). This section of the report includes information on grantmaking by subject area, geographic service area, intended beneficiary and support type.

Data for the report are collected from multiple sources. For information on the methodology used to collect and analyze data, as well as limitations to the report, see the Methodology section on page 61.

Types of Foundations

MCF categorizes foundations into three types for this report: private foundations, corporate foundations and giving programs, and community/public foundations.

Private foundations are generally founded by an individual, a group of individuals or a family, and can be further categorized as a family foundation or an independent private foundation. A family foundation is a private foundation in which the donor and/or donor's family are actively involved in the management of the foundation. A private independent foundation has no, or few, family members of the original donor actively involved in the foundation's governance. There are no legal distinctions between the two, and in this analysis MCF uses the term "private foundation" when referring to both types.

Although operating foundations are also private foundations, MCF does not include them in the *Giving in Minnesota* reports because they do not provide competitive grants. Instead, they use their funds to operate their own programs.

Corporate foundations and giving programs are connected to businesses, and their contributions and grants come from the corporation's profits. Some corporations establish foundations that are also classified as private foundations. Other companies give through a corporate giving program, which generally is funded through the company's annual budget. In many cases, corporations operate both a foundation and a corporate giving program.

Community/public foundations are publicly supported foundations operated by and for the benefit of a specific community or population, area of interest or geographic area. They manage a variety of funds on behalf of donors, from unrestricted assets to endowed funds to donor-advised funds. Community/public foundations may also manage supporting organizations. Most community/public foundations engage in fund development directly with donors.

Key Findings

Giving in Minnesota, 2009 Edition is the most comprehensive analysis of charitable giving in the state. This edition features information on overall giving in 2007, which MCF defines as the fiscal year of any Minnesota foundation or corporate giving program that ends between June 1, 2007, and May 31, 2008. This is the most recent time period for which complete data are available.

This report includes information about overall giving by foundations, corporations and individuals in Minnesota, along with detailed grantmaking trends by a sample of 100 of the state's largest grantmakers based on grants paid. The sample is made up of 50 private foundations, 34 corporate foundations and giving programs, and 16 community/public foundations. Although they represent just 7 percent of all grantmakers in Minnesota, these 100 accounted for approximately 82 percent of all grant dollars paid in the state. To report on grantmaking trends in Minnesota, MCF analyzed 27,243 grants of \$2,000 or more made by the sample, totaling \$917.9 million.

Minnesota Charitable Giving Overview

Total Giving in Minnesota Increased

In 2007, individuals, foundations and corporate giving programs in Minnesota gave a total of \$5.5 billion in charitable contributions, a 2.2-percent increase from the previous year. The growth in 2007 continues a steady upward trend in charitable giving in Minnesota.

Total Giving by Individuals Held Steady

The majority of charitable giving in Minnesota – 76 percent of all dollars given – is done by individuals. Individual giving in Minnesota held steady at \$4.19 billion in 2007, in line with 2006 levels.

Total Giving by Grantmakers Grew

Grantmakers contributed 23 percent of total charitable giving in Minnesota in 2007. Foundation and corporate giving in Minnesota totaled \$1.32 billion, an increase of 10.1 percent, from \$1.20 billion in 2006.

As in previous years, most of Minnesota's total grant dollars paid in 2007 came from a relatively small number of grantmakers. Less than 3 percent of grantmakers (38) provided 69 percent of all grantmaking (\$909 million), and 10 percent of the grantmakers (146) accounted for 86 percent of all grant dollars paid (\$1.14 billion).

Corporate Grantmakers Lead Giving

There were 1,429 active grantmakers in the state in 2007. Eighty-five percent of these were private family and independent foundations (1,209), 9 percent were corporate foundations and giving programs (131), and 6 percent were community/public foundations (89). The total number of grantmakers in the state ticked up slightly – 2.2 percent – from 2006.

Although corporate foundations and giving programs make up a small percentage of Minnesota grantmakers, historically they have given a large share of grant dollars. In 2007 they accounted for 9 percent of the grantmakers and gave 43 percent of all grant dollars. Private foundations, the majority of grantmakers in the state, gave 43 percent of grant dollars. As the smallest portion of the state's grantmakers, community/public foundations accounted for 14 percent of total grant dollars paid. From 2006 to 2007, total grantmaking increased for all three grantmaker types.

Foundation Assets Grew

Minnesota foundation assets grew to \$18.80 billion in 2007 from \$17.58 billion in 2006, a 6.9-percent increase.

Giving Trends by the Top 100 Grantmakers

Education, Human Services Lead Subject Areas

Consistent with previous years, education, human services, and public affairs/society benefit received the largest shares of Minnesota's grant dollars in 2007, at 27 percent, 24 percent and 15 percent, respectively. Only one of the three categories, public affairs/society benefit, experienced a slight decrease in giving from 2006, declining about \$2 million, or 2 percent.

The overall growth in grantmaking between 2006 and 2007 for the Giving in Minnesota sample was 9 percent. The human services, environment/animals, and international affairs subject areas experienced the fastest rate of growth in 2007 – all increased between 17 and 18 percent from 2006. The arts, culture and humanities, and health areas experienced the slowest rates of growth, at just 3 percent each.

Grantmaker Types Focus on Different Subject Areas

Private foundations provided the largest shares of grant dollars given to environment/animals (79 percent), international affairs (61 percent), health (52 percent) and human services (46 percent). These four areas also received their largest shares of grant dollars from private foundations in 2006.

Corporate grantmakers provided the largest shares of grant dollars given to arts, culture and humanities (55 percent), education (54 percent) and public affairs/society benefit (48 percent), in line with 2006 trends. Notably, corporate grantmakers' share of giving to international affairs increased by 9 percentage points, to 13 percent in 2007, from 4 percent in 2006.

Continuing a long-term trend, community/public foundations gave the largest share of grant dollars to religion (48 percent).

Geographies Served Split Between Minnesota and Beyond

The share of giving to organizations serving Minnesota was 55 percent in 2007, in line with 2006 levels. Just under \$500 million was given to organizations serving Minnesota in 2007: 32 percent went to the Twin Cities metro area, 12 percent went to Greater Minnesota, and 11 percent went to Minnesota statewide. Among all geographic areas, giving to Greater Minnesota grew fastest, increasing 18 percent in 2007 compared to 2006.

The share of giving to organizations serving the nation decreased to 12 percent in 2007, from 14 percent in 2006.

Children and Youth Top Beneficiary Groups

Only 53 percent of grants could be coded to a specific beneficiary group. Of those, the largest shares of dollars went to organizations that serve the following four intended beneficiary groups:

- Children and youth (22.2 percent, or \$209.4 million)
- Adults (9.2 percent, or \$86.8 million)
- Poor or economically disadvantaged (4.8 percent, or \$45.5 million)
- Native Americans/American Indians (3.3 percent, or \$31.3 million)

Program Support Leads General Operating

Minnesota grantmakers continued to devote the largest share of their grant dollars – 55.3 percent, or \$453.7 million – to program support. The share of grant dollars for general support declined again in 2007, to 20.9 percent. Giving for capital support grew in 2007, to \$122.3 million, from \$89.6 million in 2006.

Minnesota Giving Overview

This section provides an overview of trends in total Minnesota charitable giving by individuals, private foundations, corporate foundations and giving programs, and community/public foundations. For the purposes of this study, Minnesota grantmakers include a few organizations that are located in border cities such as Hudson, WI, and Fargo, ND, when contributions are made in both Minnesota and border states. The Minnesota grant dollars accounted for in this report have been distributed geographically within Minnesota, as well as across the U.S. and internationally.

All dollar values in *Giving in Minnesota, 2009 Edition* have been adjusted for inflation to 2007 dollars, using the Consumer Price Index (CPI).

Total Charitable Giving

In 2007, individuals, foundations and corporate giving programs in Minnesota gave a total of \$5.5 billion in charitable contributions, a 2.2-percent increase from the previous year (see Table 1 and Figure A). The growth in 2007 continues a steady upward trend in charitable giving in Minnesota.

Individual donors account for the majority of charitable giving in the state: 76 percent of all giving is done by individuals. Foundations and corporate giving programs account for the remaining 23 percent of giving. Private foundations and corporate grantmakers were each responsible for 10 percent of all giving in 2007, and community/public foundations accounted for 3 percent (see Figure B).

Total Individual Giving

Individual charitable giving in Minnesota remained flat from 2006 to 2007, at \$4.19 billion. This follows a decrease in individual giving by Minnesotans of 4.0 percent between 2005 and 2006. Nationally, charitable giving rose 1.3 percent from 2006 to 2007 (see Table 2 and Figures C & D).

The total number of Minnesotans claiming charitable contributions on tax returns decreased slightly in 2007 (less than 1 percent), to 906,845. Of all Minnesotans who filed tax returns, the proportion who claimed charitable contributions was 33.2 percent in 2007, similar to the 35.7 percent who claimed in 2006.

The average contribution per itemized return for Minnesotans in 2007 was \$3,785, a slight increase from 2006 (\$3,652). The average size of contributions by Minnesotans in 2007 remained below the national average of \$4,623, a long-term trend. This difference has historically been related to Minnesotans itemizing at a higher rate than the national average, a factor that tends to include more individuals with

lower charitable giving levels in the average contribution figure for the state. In 2007, Minnesota ranked fourth in the percentage of state residents itemizing their federal returns (39.7 percent), compared to 33.1 percent nationally. In 2007, Minnesota ranked 22nd in the percentage of its residents' adjusted gross income given to charity; in 2006, the state was ranked 19th.

Total Foundation and Corporate Giving

Foundation and corporate giving in Minnesota totaled \$1.32 billion in 2007, an increase of 10.1 percent, from \$1.20 billion in 2006 (see Table 3). Similarly, from 2005 to 2006, total grantmaking increased by 10.6 percent. Nationally, foundation giving increased 10.7 percent in 2007. Table 4 and Figure E illustrate the steady upward trend in giving in Minnesota since 1992.

Number of Minnesota Grantmakers

In 2007, Minnesota was home to a total of 1,429 active grantmakers, an increase of 2.2 percent from 2006. In 2007, 85 percent of the grantmakers were private foundations (1,209), 9 percent were corporate foundations and giving programs (131), and 6 percent were community/public foundations (89) (see Table 5 and Figure F).

Between 1997 and 2007, the total number of grantmakers in Minnesota increased 65.6 percent. During this period, community foundations experienced the fastest rate of growth; the number of community foundations increased by 71.2 percent, to 89, from 52. Private foundations grew by 67 percent, to 1,209 from 726; however, most of the growth in private foundation creation occurred during the years of 1997-2001. Corporate foundations and giving programs grew by 54 percent, to 131 from 85.

This trend mirrors the explosive growth seen in the number of foundations nationally. Foundation Center reports that the number of foundations around the country grew to 75,187 in 2007 from 44,146 in 1997, an increase of 70 percent.

Most of Minnesota's total grants paid in 2007 came from a relatively small number of grantmakers (see Table 6), continuing a long-term trend. Less than 3 percent of grantmakers (38) provided 69 percent of all grants paid (\$909 million), and 10 percent of the grantmakers (146) accounted for 86 percent of all grants paid (\$1.14 billion).

Grants Paid by Grantmaker Type

Of the \$1.32 billion granted in 2007, 43 percent was given by corporate foundations and giving programs, 43 percent was given by private foundations, and 14 percent by community/public foundations (see Figure G).

Although corporate foundations and giving programs make up a small percentage of Minnesota grantmakers, they continued a long-term trend of accounting for a disproportionately high percentage of the total amount of grants paid in 2007. Specifically, corporate grantmakers comprised 9 percent of all grantmakers but gave 43 percent of all grant dollars. While private foundations made up the vast majority of grantmakers (85 percent), they accounted for just 43 percent of the grant dollars paid, due to the fact that the majority of grantmakers making \$50,000 or less in annual grants are small, private family foundations. Community/public foundations represented 6 percent of the grantmakers in 2007 and paid 14 percent of the total grant dollars.

From 2006 to 2007, total grantmaking increased for all three grantmaker types (see Table 7 and Figure H).

- Community/public foundations experienced the largest increase in grantmaking, to \$179 million in 2007 from \$149 million in 2006 (19.8 percent).
- Corporate grantmaking increased to \$564 million in 2007 from \$498 million in 2006 (13.3 percent).
- Private foundations increased grantmaking to \$575 million in 2007 from \$551 million in 2006 (4.5 percent).

Foundation Assets

Minnesota foundation assets grew to \$18.80 billion in 2007 from \$17.58 billion in 2006, a 6.9-percent increase, slightly more than the 5.3-percent increase the previous year (see Table 8 and Figure I).

Growth in a foundation's assets in one year can lead to an increase in the foundation's grantmaking a year or more in the future. Foundations typically base their future grant levels on a one- to three-year average of past asset performance. Therefore, it may be several years for asset declines or increases to be fully reflected in grant levels.

Grantmaking by Congressional District

Foundations and corporate grantmakers located in Congressional District 5, which includes Minneapolis and surrounding suburban areas, disbursed the most grant dollars (\$688 million) in 2007, followed by grantmakers located in Congressional District 4 (\$303 million), which includes St. Paul and its surrounding suburbs (see Table 9). Grantmakers in District 3, suburban Hennepin County, gave \$125 million. Foundations in remaining districts each granted less than \$100 million. Grantmakers in Congressional District 7, which covers most of western Minnesota, granted the smallest amount, at \$12 million.

The grant dollars reported by Congressional District are associated with the location of the grantmaker, not the location of the organizations receiving funds or the recipient organization's service area.

Congressional Districts 5, 3 and 4 had the most grantmakers located in their areas (393, 359 and 272, respectively). Congressional Districts 5 and 4 were home to the foundations with the highest total assets (\$6.6 billion and \$5.0 billion, respectively), followed by Congressional District 1 (\$3.2 billion), which extends across southern Minnesota.

Top Five Minnesota Grantmakers

Minnesota's five largest grantmakers in 2007, based on cash contributions¹, are listed below. In 2007, Medtronic Foundation displaced Bush Foundation, which was in the top 5 in 2006 and which granted \$40.2 million dollars in that year. The other four were among the largest grantmakers in both 2006 and 2007.

1. The McKnight Foundation	\$93,643,806
2. General Mills Foundation and Corporation	\$64,473,353
3. The Saint Paul Foundation ²	\$59,565,623
4. The Minneapolis Foundation ³	\$49,540,078
5. Medtronic Foundation and Corporation	\$47,476,419

For complete lists of top Minnesota grantmakers by grants paid in 2007, see Appendices ii through vi.

Giving From Non-Minnesota Foundations

Minnesota nonprofits also receive philanthropic dollars from individuals and foundations located outside of Minnesota. Data from the Foundation Center indicate that national foundations (not based in Minnesota) included in *Foundation Giving Trends*, 2009 sample, gave 975 grants worth \$151 million to Minnesota charities in 2007.

Twenty-two percent of the funds, \$33.1 million, were given by five foundations and included large gifts to the Mayo Clinic and to various projects at the University of Minnesota.

The five largest national grantmakers giving to Minnesota and the amount given in 2007 were⁴:

1. The Annenberg Foundation	\$8,529,000
2. The Robert Wood Johnson Foundation	\$7,264,272
3. The Grainger Foundation Inc.	\$6,054,350
4. The Gonda Family Foundation	\$5,734,830
5. Wells Fargo Foundation ⁵	\$5,497,474

For a list of the 50 top non-Minnesota grantmakers giving to the state in 2007 see Appendix vii.

¹ MCF compiles a ranking of the top grantmakers each year based on cash contributions. In order to ensure that grantmakers are compared consistently, MCF does not include in-kind or other non-cash contributions. In 2007, Target Foundation & Corporation did not report cash-only contributions. Instead, Target reported combined cash and in-kind contributions of \$169 million for the fiscal year ending 2/2/08. Because a separate cash contribution total was not provided, MCF is not able to include Target on the 2007 list.

² The Saint Paul Foundation includes the Minnesota Community Foundation, J. Paper Foundation and A.F. Paper Foundation.

³ The Minneapolis Foundation includes Robins, Kaplan, Miller and Ciresi Foundation for Children and Nonprofits Assistance Fund.

⁴ The Foundation Center, 2009. Based on grants of \$10,000 or more awarded by a national sample of 1,339 larger U.S. foundations (including 800 of the 1,000 largest ranked by total giving). For community foundations, only discretionary grants are included. Grants to individuals are not included.

⁵ The Wells Fargo Foundation is headquartered in California, but Wells Fargo Foundation Minnesota and Wells Fargo Bank Minnesota supply to MCF their state giving data to be included as a Minnesota-based grantmaker. The amount here, provided by the Foundation Center, includes only grants of \$10,000 or more and does not include corporate giving.

2007 Giving in Minnesota Sample Trends

In order to provide detailed information on trends in giving in Minnesota, each year MCF analyzes the giving of 100 of the largest grantmakers in the state, by grants paid, for which MCF can obtain information. All subsequent analysis in this report is based on the grantmaking of these 100 grantmakers.

All dollar values in *Giving in Minnesota, 2009 Edition* have been adjusted for inflation to 2007 dollars, using the Consumer Price Index (CPI).

The 100 grantmakers included in MCF's analysis in 2007 included 50 private foundations, 34 corporate foundations and giving programs, and 16 community/public foundations (see Figure J). Eighty-five percent of the grantmakers included in the 2006 sample were also included in the 2007 sample. Appendix i provides a complete list of the grantmakers in the 2007 sample.

Although these 100 grantmakers represent only 7 percent of all grantmakers in Minnesota, they accounted for \$1.1 billion in grantmaking, or about 82 percent of all grantmaking in the state in 2007. As a group, their assets were \$14.6 billion in 2007, an 11 percent increase from 2006.

The sampling base for this year's report includes 27,243 grants of \$2,000 or more awarded by 100 of the largest grantmakers in Minnesota in 2007. These grants totaled \$917.9 million and represented 85 percent of the total giving of these 100 grantmakers⁶.

Of the 27,243 grants awarded in the 2007 Giving in Minnesota sample:

- 50 percent were made by corporate grantmakers;
- 27 percent were made by community/public foundations;
- 22 percent were made by private foundations. (See Figure K.)

Of the \$917.9 million grant dollars included in the 2007 Giving in Minnesota sample:

- 43 percent were granted by corporate grantmakers.
 - 42 percent were granted by private foundations.
 - 15 percent were granted by community/public foundations.
- (See Figure L and Table 10.)

The overall growth in grantmaking between 2006 and 2007 for the Giving in Minnesota sample was 9 percent. This was slightly slower growth than the 13.2 percent experienced by a national sample of 1,339 foundations, as reported by the Foundation Center in *Foundation Giving Trends, 2009*.

In 2007, the average grant size of grantmakers in the Giving in Minnesota sample increased by 6 percent, to \$31,022. This follows decreases in average grant size of 14 percent in 2005 and 6 percent in 2006.

Private foundations have continued to provide larger average grants (\$63,081) than corporate grantmakers (\$23,189) and community/public foundations (\$18,624). However, from 2006 to 2007, all types of grantmakers experienced increases in average grant sizes, with corporate grantmakers experiencing the largest increases, at 9 percent. (See Table 11 for additional details.)

For more information, including information on sources used in this report, see the Methodology section on page 61.

Top Five Minnesota Grantmaking Recipients

The following Minnesota nonprofit organizations received the largest total grant dollars from Minnesota's 100 largest grantmakers in 2007. All the organizations listed below, except for Warroad Care Center, also received the largest grant dollars in 2006. In 2006, Family Housing Fund was among the top 5 recipients, having received a total of \$8.0 million that year.

1.	University of Minnesota	\$26,018,951
2.	Greater Twin Cities United Way	\$23,137,846
3.	Mayo Foundation and Clinic	\$9,345,173
4.	Scholarship America (Minnesota)	\$9,082,902
5.	Warroad Care Center	\$8,650,000

⁶ Total giving by the sample, including grants of less than \$2,000, was \$1.1 billion, an increase of 14 percent from 2006.

Grantmaking by Subject Area

- *Education, human services, and public affairs/society benefit received the largest shares of Minnesota's grant dollars in 2007.*
- *In Minnesota, human services, environment/animals, and international affairs experienced the fastest growth in giving in 2007.*
- *In 2007, Minnesota continued a long-term trend of giving a significantly larger share of grant dollars to human services than the national share and a significantly smaller share of grant dollars to health.*

This section provides a detailed analysis, by subject area, of the \$917.9 million in grants of \$2,000 or more made by 100 of the largest grantmakers in the state for which MCF could obtain information. Comparative information on state and national grantmaking, as well as more detailed analyses of patterns of giving in each subject area, and a list of the top five grantmakers and top five grant recipients for each subject area are also provided.

To analyze trends by subject area, MCF uses the National Taxonomy of Exempt Entities (NTEE) coding system to classify grants into eight major subject areas: arts, culture & humanities; education; environment/animals; health; human services; international affairs; public affairs/society benefit; and religion. For more information on subcategories within each subject area, see Appendix x. For more information on the NTEE coding system, see the Methodology section on page 61.

MCF codes subject areas according to grant descriptions. When no description is available, a grant is coded according to the purpose of the recipient organization. For example, a grant made to the University of Minnesota for the purpose of medical research would be coded as health, reflecting the intended use of the funds. However, a grant made to the University, with no specific description attached, would be coded as education.

Overall Subject Area Trends

In 2007 (covering fiscal years that ended between 6/1/07 and 5/31/08), grant dollars increased for seven of the eight major subject areas, in spite of the first signs of recession in early 2008 (see Table 12). Public affairs/society benefit was the only subject area to experience slightly decreased giving – of about \$2 million or 2% – during 2007. Human services, environment/animals, and international affairs were the three subject areas experiencing the fastest growth rates – all between 17 and 18 percent – in 2007 compared to 2006. The arts, culture and humanities, and health subject areas experienced the slowest rates of growth in giving in 2007, at just 3 percent each. Overall, the Giving in Minnesota 2009 sample experienced a growth rate of 9 percent.

As in previous years, the three subject areas receiving the largest shares of Minnesota's grant dollars were education, human services and public affairs/society benefit (see Figure M). Education again received the largest share of grant dollars in 2007, at 27 percent, a 1 percentage point increase from 2006. The human services share of the state's grants increased 2 percentage points to 24 percent in 2007. In spite of the fact that the overall share of grant dollars given to public affairs/society benefit decreased between 2006 and 2007, that subject area remained the third-largest in terms of share of grant dollars, at 15 percent. (For detailed information, see Table 12 and Figure N.)

In spite of their rapid rates of growth from 2006 to 2007, environment/animals and international affairs received the same share of grant dollars, 5 percent and 2 percent, respectively.

The arts, culture & humanities share continued to decrease in 2007, to 13 percent, following a decline from 16 percent in 2005 to 14 percent in 2006. The share of grant dollars going to religion stayed the same, at 3 percent, while the share going to health declined by 1 percentage point, to 10 percent.

Subject Area Grantmaking by Grantmaker Type

Although education, human services and public affairs/society benefit continued as the three subject areas receiving the largest shares of Minnesota grant dollars in 2007, funding for each subject area varied by grantmaker type (see Table 13 and Figure O).

Private foundations provided the largest share of grant dollars to environment/animals (79 percent), international affairs (61 percent), health (52 percent) and human services (46 percent) in 2007. These four areas also received their largest shares of grant dollars from private foundations in 2006. Private foundations provided the smallest share of grant dollars to religion in both 2007 and 2006.

Corporate grantmakers provided the largest share of grant dollars to arts, culture & humanities (55 percent), education (54 percent), and public affairs/society benefit (48 percent) in 2007, in line with 2006 trends, while international affairs received its smallest share (13 percent) from corporate grantmakers. Notably, though, corporate grantmakers' contributions to international affairs increased by 9 percentage points, to 13 percent in 2007, from 4 percent in 2006.

As in previous years, community/public foundations gave the largest share of grant dollars to religion, at 48 percent.

At 15 percent, community/public foundations provided the smallest amount of giving in the sample, thus they contributed the lowest share of grant dollars to six of the seven other subject areas. By contrast, private foundations provided 42 percent of the grant dollars in the sample and corporate grantmakers provided 43 percent of the dollars in the sample.

See Appendices viii and ix for additional information about the share of each grantmaker type's total giving to each subject area.

Comparison of Minnesota and National Grantmaking

As in previous years, Minnesota grantmaking in 2007 was similar to national grantmaking in the shares of total grant dollars going to six of eight subject areas⁷ (see Table 14 and Figure P). Notable differences existed in the shares given to health and human services.

Education and human services received the largest shares of grant dollars in Minnesota in 2007, at 27 percent and 24 percent, respectively. Nationally, education and health tied for first, each with a 23-percent share. Public affairs/society benefit ranked third in Minnesota and nationally, at 15 percent each.

The greatest differences between Minnesota and the nation have historically been and continue to be in the fields of human services and health. Although Minnesota grantmakers devoted 24 percent of their grant dollars to human services, the national share for grantmakers across the country was 15 percent. Conversely, health received 10 percent of grant dollars in Minnesota, compared to 23 percent nationally.

Two of the eight subject areas (human services; public affairs/society benefit) experienced a change of greater than 1 percentage point in share of grant dollars in Minnesota in 2007. Human services experienced a 2 percentage point increase in share, while public affairs/society benefit experienced a 2 percentage point decrease in share.

Care should be taken in making direct comparisons between national and Minnesota grantmaking data. The data differ in several ways. First, MCF and the Foundation Center use different samples: MCF's sample is made up of all grants of \$2,000 or more made by 100 of the largest grantmakers in Minnesota for which information can be obtained, while the Foundation Center's sample is made up of all grants of \$10,000 or more made by 1,339 larger foundations around the country. Second, the Foundation Center does not include data on corporate giving programs, while MCF does. Third, each organization uses different fiscal years.

⁷ Foundation Center provides giving data for two additional focus areas – Social Sciences and Science and Technology. These two areas combined account for 3 percent of giving, nationally. Because they account for a small percentage of all giving, MCF does not analyze these two categories separately but rather includes them in the Public Affairs/Society Benefit category.

** The Foundation Center, *Foundation Giving Trends, 2009*. Based on all grants of \$10,000 or more awarded by a sample of 1,339 larger foundations.

Arts, Culture and Humanities

- *The arts represented a smaller share of overall giving – 13 percent – in 2007 than in previous years.*
- *Total grant dollars increased to \$117.7 million, or 3 percent, from 2006.*
- *At 55 percent, corporate grantmakers provided the largest share of funding to the arts.*
- *The five largest arts funders gave 56 percent of grant dollars in 2007.*

Grantmaking to arts, culture and humanities includes contributions to the performing arts, museums, media/communications, cultural organizations, historical societies, visual arts, humanities, and arts services.

Trends in Arts Grantmaking

Funding for the arts was one of the slowest growing areas of grantmaking in 2007, increasing to \$117.7 million, from \$114.2 million in 2006 (see Table 12 and Figure Q). The share of total grant dollars going to the arts has decreased slightly in recent years – from 16 percent in 2005 to 14 percent in 2006 to 13 percent in 2007. Declines during this period were due in part to the conclusion of capital campaigns by several major arts organizations, such as Minnesota Public Radio, the Walker Art Center, the Children’s Theatre Company, the Guthrie Theatre, and the Minneapolis Institute of Arts. In 2007, giving to the arts returned to pre-capital-campaign-era levels (see Figure R).

Minnesota’s 13-percent share of 2007 grant dollars going to the arts was slightly higher than the national average (11 percent), continuing a long-term trend (see Figure R). It is important to note that MCF’s sample of Minnesota grantmakers includes corporate giving programs, while the Foundation Center’s national sample does not.

Arts Grantmaking by Grantmaker Type

Between 2005 and 2007, corporate grantmaking to the arts increased significantly, while private grantmaking to the arts decreased (see Figure S and Table 15).

In Minnesota:

- Corporate grantmakers increased their share of grant dollars to the arts, to 55 percent in 2007, an 11 percentage point increase since 2005. Much of this change was due to increased giving to the arts by Target Foundation.
- Conversely, private foundation giving to the arts has dropped 11 percentage points since 2005. In 2007, private foundations provided 33 percent of the grant dollars for the arts.
- Community/public foundations’ share has remained relatively steady, at 12 percent in 2007, following two years of 11 percent shares.

Arts Grantmaking by Subcategory

Two subcategories, performing arts and other arts/cultural organizations, continued to receive the largest share of grant dollars among arts subcategories in 2007, at 36 percent and 20 percent, respectively (see Figure T and Table 16). Arts services, humanities, and historical societies received the smallest share of grant dollars – all between 2 and 3 percent.

Among the arts subcategories, giving to other arts/cultural organizations and arts/cultural organizations-multipurpose experienced the strongest growth rates (35 percent and 12 percent, respectively) in 2007. Other arts/cultural organizations includes funds for fundraising, arts access, and interdisciplinary arts programs. The arts/cultural organizations-multipurpose subcategory includes funds for art schools and arts councils. The increase in these areas was partly due to changes to the Giving in Minnesota sample: The James Ford Bell Foundation, which made several large arts grants in 2007, was not included in the sample in 2006.

Giving to most other subcategories declined (see Table 16), with the visual arts, media/communications, and arts services posting the most significant declines (-38 percent, -18 percent, and -15 percent, respectively). This was due in part to the conclusion of several large arts capital campaigns.

Largest Arts Grantmakers

Minnesota’s five largest arts grantmakers in 2007 are listed below. These five grantmakers granted 56 percent of all dollars given to the arts by the 100 largest grantmakers in the sample in 2007.

1. Target Foundation & Corporation	\$36,552,199
2. The McKnight Foundation	\$10,852,330
3. The Minneapolis Foundation	\$7,385,570
4. Bush Foundation	\$6,599,495
5. The Saint Paul Foundation	\$4,916,915

Top Arts Grant Recipients

The top five recipients of Minnesota’s arts grant dollars in 2007 are below. These five recipients received 16 percent of the arts grant dollars made by the sample in 2007.

1. Children's Theatre Company (MN)	\$4,736,205
2. Minneapolis Institute of Arts	\$4,242,903
3. Walker Art Center	\$4,135,870
4. Minnesota Orchestral Association	\$3,115,924
5. The Guthrie Theater	\$2,975,000

Education

- At \$245.6 million, education received the largest share of grant dollars among the eight major fields in 2007.
- Total grant dollars to education increased by 12 percent from 2006.
- Elementary/secondary education and higher education & professional schools continued to receive the largest shares of education grant dollars.
- The five largest education funders gave 50 percent of grant dollars to education in 2007.

Education grantmaking includes contributions to educational institutions (schools, colleges and universities), libraries, and other organizations that provide education-related services. Other recipients include alumni associations, English-as-a-Second-Language (ESL) programs and adult literacy services.

Trends in Education Grantmaking

In 2007, the Giving in Minnesota sample awarded \$245.6 million in grants to education, up from \$218.5 million in 2006 (see Figure U). Education accounts for the largest share of the state's total grant dollars (27 percent) (see Table 12). Education has been Minnesota's top-ranked category in all but two years – 2001 and 2005 – since MCF began conducting Giving in Minnesota studies. Funding for education grew at a faster rate in 2007 – 12 percent – than the overall rate of increase in giving of 9 percent by the sample.

Minnesota's 27-percent share of grant dollars for education was higher than the national average (23 percent) (see Figure V).

Education Grantmaking by Grantmaker Type

In 2007, the share of funding provided to education by private, corporate, and community/public grantmakers was in line with 2006. This follows a significant shift in shares from 2005 to 2006, when Target's Take Charge of Education program was added to the sample. (See Table 17 and Figure W.)

In Minnesota in 2007:

- Corporate grantmakers' share of funding was 54 percent.
- Private foundations' share of funding for education was 35 percent.
- Community/public foundations provided 11 percent of the philanthropic funding to education in 2007, in line with 2005 and 2006 levels.

Education Grantmaking by Subcategory

As in previous years, the subcategories of elementary/secondary education and higher education & professional schools received the largest shares of education grant dollars (39 percent and 24 percent, respectively) in 2007 (see Figure X and Table 18). Both these subcategories grew by 11 percent in 2007. The fastest growing subcategory was other education, which increased by 45 percent. This subcategory includes fund development, employee matching funds for education, and grants for interdisciplinary educational programs.

Nineteen percent of Minnesota's education grant dollars went to student or educational services – such as after-school, college readiness, tutoring, drop-out prevention, and reading promotion programs – making it the third largest subcategory in education in Minnesota. However, this subcategory experienced a comparatively slow rate of growth, only 3 percent, in 2007. Nationally, only 9 percent of education dollars went to educational or student services, according to the most recent Foundation Center data.

The two smallest subcategories within education – adult/continuing education and vocational/technical schools – each received less than 1 percent of the education grant dollars, and notably, experienced major declines in giving in 2007 (see Table 18). Giving to adult/continuing education declined by 59 percent, while giving to vocational/technical declined by 51 percent. It is important to note that overall giving to each of these subcategories is quite small, so small decreases in giving may be reflected as large percentage changes.

Largest Education Grantmakers

Minnesota's five largest education grantmakers in 2007 are listed below. These five grantmakers gave 50 percent of the total education dollars in the sample.

1. Target Foundation and Corporation	\$51,022,885
2. General Mills Community Action	\$38,376,435
3. Bush Foundation	\$11,625,459
4. Fred C. and Katherine B. Andersen Foundation	\$11,177,500
5. The McKnight Foundation	\$10,248,000

Top Education Grant Recipients

The top five recipients of Minnesota's education grant dollars in 2007 are listed below. These five grant recipients received 15 percent of the grant dollars the sample gave to education in 2007.

1. University of Minnesota	\$15,836,989
2. Scholarship America Inc. (Minnesota)	\$9,082,902
3. Minnesota State University-Mankato	\$5,341,405
4. St. Paul Public Schools	\$3,965,425
5. Achieve! Minneapolis	\$3,115,074

Environment/Animals

- *At 5 percent, giving to environment/animals was a relatively small share of overall philanthropic giving in 2007.*
- *Funding for environment/animals grew 17 percent in 2007, making it one of the fastest growing areas among the eight major subject areas.*
- *Private foundations provide the vast majority of support for environment/animals, and their contributions continued to grow significantly in 2007.*
- *The five largest environment/animals funders gave 68 percent of the grant dollars to this area in 2007.*

The environment/animals subject area includes two broad categories. Environment grants go to organizations that focus on the preservation and protection of the environment, botanical gardens and societies, urban beautification, and environmental education. Environment grant recipients have included recycling programs, resources conservation, botanical gardens and wildlife preservation organizations.

Animals grants go to organizations that focus on the care and protection of animals, including wildlife, pets and specialty animals. Examples of such organizations include animal population control agencies, bird sanctuaries and zoos.

Trends in Environment/Animals Grantmaking

Grantmakers in Minnesota gave \$44.5 million to environment/animals in 2007, up from \$38 million in 2006 (see Figure Y). Funding for this subject area grew 17 percent from 2006 to 2007, nearly twice the 9 percent rate of growth experienced by the sample as a whole, making this one of the fastest growing subject areas in the Giving in Minnesota sample.

The share of grant dollars in the sample dedicated to environment/animals was 5 percent in 2007, in line with 2006 (see Table 12).

The 5-percent share of grant dollars in Minnesota going to environment/animals in 2007 was lower than the national average of 7 percent, continuing a long-term trend (see Figure Z). The rapid rate of growth in giving to this field mirrors national trends: Grantmaking to environment/animals grew by 28.5 percent nationally.

Environment/Animals Grantmaking by Grantmaker Type

In 2007, private foundations in Minnesota continued to give the most grant dollars to environment/animals by far of any grantmaker type. Funding by corporate grantmakers and community/public foundations for environment/animals decreased from 2006 (see Table 19 and Figure AA).

In Minnesota:

- Private foundation giving to environment/animals increased 28 percent, to \$35 million in 2007 from \$27.4 million in 2006. This represents 79 percent of the giving to this issue area.
- Corporate grantmakers provided 15 percent of the grant dollars for environment/animals, or \$6.5 million, a drop of 7 percent from 2006.
- Community/public foundations provided 7 percent of the grant dollars to this issue area, or \$2.9 million, a drop of 19 percent from 2006.

Environment/Animals Grantmaking by Subcategory

Consistent with previous years, the natural resources, conservation & protection subcategory received by far the largest share (65 percent) of environment/animals grants (see Figure AB and Table 20). General environmental programs received the second largest share (11 percent).

Several subcategories within environment/animals experienced explosive growth in 2007, while others experienced dramatic decreases. Because overall funding for these subcategories is relatively small, slight increases and decreases in funding have a big impact on their growth rates.

Those experiencing the strongest growth rates include environmental education and outdoor survival (222 percent), other animal-related (105 percent), and animal protection and welfare (80 percent). Those experiencing the largest declines include zoos/zoological societies (-61 percent), other environmental (-56 percent), botanical, horticultural, and landscape services (-43 percent).

The following two reasons may account for some of these increases and decreases: First, the composition of the Giving in Minnesota sample changed in 2007. The James Ford Bell Foundation, a significant environmental grantmaker, was included in the 2007 sample of the largest grantmakers in Minnesota, while the Mary Livingston Griggs and Mary Griggs Burke Foundation, also a significant environmental grantmaker, was not. Second, the animal protection and welfare subcategory received more, larger grants, while the other environment subcategory received fewer large grants in 2007.

Giving to environmental grantmaking subcategories far outweighs giving to animal subcategories, with the environment representing 91 percent of the grants made within this subject area.

Largest Environment/Animals Grantmakers

Minnesota's five largest environment/animals grantmakers in 2007 are listed below. These five grantmakers granted 68 percent of all dollars given to environment/animals by the sample in 2007.

1.	The McKnight Foundation	\$15,375,512
2.	Blandin Foundation	\$4,645,500
3.	Robina Foundation	\$4,280,000
4.	Bush Foundation	\$3,641,920
5.	James Ford Bell Foundation	\$2,141,266

Top Environment/Animals Grant Recipients

The top five recipients of Minnesota's environment/animals grant dollars in 2007 are listed below. These five recipients received 39 percent of the environment/animals grant dollars made by the sample in 2007.

1.	Energy Foundation (California)	\$5,000,000
2.	The Nature Conservancy (Minnesota)	\$4,473,517
3.	Minnesota Department of Natural Resources	\$4,280,000
4.	Belwin Nature Center	\$2,025,000
5.	The Nature Conservancy (Virginia)	\$1,727,000

Health

- *Ten percent of grant dollars – or \$96.1 million – went to health.*
- *Funding for health in Minnesota grew 3 percent in 2007, making it one of the slowest growing areas among the eight major subject areas.*
- *Funding for health has long been a significantly smaller portion of overall giving in Minnesota than nationally; 2007 was no exception.*
- *Private foundations provided the most funds for health; giving by private foundations to this issue area grew by 13 percent in 2007.*

Health grantmaking includes the following four subcategories: general and rehabilitative health (which includes funding for hospitals and nursing homes, primary care, and outpatient facilities); mental health/crisis intervention; multipurpose health (which includes funding for services associated with specific diseases); and medical research. Health grant recipients include hospitals and health care centers, mental health treatment centers, cancer associations and organizations conducting research on specific diseases.

Trends in Health Grantmaking

Grantmakers in Minnesota gave \$96.1 million to health in 2007, up slightly from \$93.4 million in 2006 (see Table 12 and Figure AC). This represented 10 percent of the Giving in Minnesota sample's total grant dollars. Giving to health in Minnesota grew at a slow pace in 2007 – increasing only 3 percent – significantly slower than the 9 percent growth in overall giving by the sample. In 2005 and 2006, health captured 11 percent of the grant dollars in the sample.

Although health giving grew slowly in 2007, the subject area experienced a large increase between 2005 and 2006; between 2005 and 2006, the amount given to health increased by 19 percent. This increase was related to at least two major activities, both of which were ongoing in 2007. First, Hazelden's Women's Recovery Center and Lakeview Memorial Hospital, as well as other hospitals, began major capital campaigns in 2006 that continued into 2007. Second, the Fred C. and Katherine B. Andersen Foundation doubled its giving to health from almost \$5 million in 2005 to \$10 million in 2006. In 2007, it increased giving to health by a smaller amount, to about \$12.4 million.

Funding for health has long been a significantly smaller portion of overall giving in Minnesota than nationally, and 2007 was no exception (see Figure AD). The share of health grantmaking nationally continued to be more than double that of Minnesota (see Table 14). In recent years, this wide disparity has been due, in part, to the large percentage of health grants given by the Bill and Melinda Gates Foundation; in 2007, that organization gave \$1.65 billion to health, which represents 34 percent of all giving to health by the Foundation Center's national sample.

The share of giving to health in Minnesota is also less than the average across the Midwest as a whole. As a region, 15 percent of grant dollars go to health, according to the Foundation Center's *Foundation Giving Trends, 2009*.

While grantmaking to the health field experienced slow growth in Minnesota, nationally health grantmaking grew by 11.7 percent.

Health Grantmaking by Grantmaker Type

Within the Giving in Minnesota sample, private foundations provided the largest amount of funding for health. Community/public foundations' giving to health dropped significantly in 2007 (see Table 21 and Figure AE).

In Minnesota:

- *Private foundations provided just under \$50 million to health, 52 percent of the giving to this subject area. In 2007, giving to health by private foundations grew 13 percent.*
- *Corporate grantmakers gave a similar share to health as in previous years – 34 percent. Their health giving totaled \$32.8 million, a 7 percent increase from 2006.*
- *Community/public foundations gave \$13.4 million to health, a 28 percent decrease from 2006. In 2006, The Minneapolis Foundation provided two large grants for cancer research totaling \$3.5 million to the Mayo Clinic and Mayo Foundation. Those grants were not repeated in 2007.*

Health Grantmaking by Subcategory

The general and rehabilitative health subcategory received the largest share of health dollars, as it has in previous years (see Table 22 and Figure AF). Fifty-nine percent of the health dollars, or \$57 million, funded this area, with the majority of the dollars going to hospitals, nursing homes, primary care, and outpatient facilities (see Appendix x). Despite receiving the most funding, this subcategory's share of grant dollars has decreased consistently since 2004, following a large, one-time grant of \$20 million by Blandin Foundation to Grant Itasca Clinic and Hospital that year.

Multipurpose health, which includes funding for services associated with specific diseases, received the second largest share of grant dollars – 21 percent or \$19.7 million. Giving to this subcategory grew by 42 percent in 2007. Growth was due in part to changes in the composition of the Giving in Minnesota sample. In 2007, the sample included the Richard M. Schulze Family Foundation, which gave a grant of just under \$5 million to the Mayo Clinic.

Funding for medical research and mental health/crisis intervention – the two smallest subcategories within health – both declined in 2007, by 35 percent and 9 percent, respectively. The decrease in funding for medical research was partially the result of the two grants for cancer research made by The Minneapolis Foundation to Mayo Clinic and Mayo Foundation in 2006 that were not repeated in 2007.

Largest Health Grantmakers

Minnesota's five largest health grantmakers in 2007 provided 38 percent of the funding to health by the sample. They are:

1.	Fred C. and Katherine B. Andersen Foundation	\$12,403,750
2.	The Medtronic Foundation	\$7,971,028
3.	St. Jude Medical Foundation	\$6,244,975
4.	The McKnight Foundation	\$5,290,000
5.	Richard M. Schulze Family Foundation	\$4,920,950

Top Health Grant Recipients

The top five recipients of Minnesota's health grant dollars in 2007 received 25 percent of the sample's health grant funds. They are:

1.	Mayo Foundation and Clinic	\$9,195,173
2.	The McKnight Endowment Fund for Neuroscience	\$4,506,000
3.	Lakeview Memorial Hospital	\$4,099,000
4.	Gillette Children's Hospital	\$3,623,000
5.	Regions Hospital Foundation	\$2,650,500

Human Services

- *Twenty-four percent of the giving – or \$222.9 million – went to human services in 2007.*
- *At 18 percent growth from 2006, human services was the fastest growing area in 2007 among the eight major subject areas.*
- *The share of funding for human services by Minnesota grantmakers continued to be greater than the national average.*
- *Giving to human services by all grantmaker types increased significantly in 2007 compared to 2006.*

The human services subject area consists of the following subcategories: multipurpose human services; housing/shelter; youth development; public safety, disaster preparedness and relief; food, nutrition and agriculture; public protection; employment/jobs; and recreation, leisure and sports.

Trends in Human Services Grantmaking

Grantmakers in Minnesota gave \$222.9 million to human services in 2007, up from \$188 million in 2006 (see Figure AG). The human services field captured 24 percent of the Giving in Minnesota sample's total grant dollars (see Table 12). Human services is the second largest major field, by dollars, in the sample, as well as the fastest growing field. Giving to human services grew by 18 percent between 2006 and 2007, double the 9 percent growth in overall giving by sample, and a notable increase from the 2 percent growth human services experienced between 2005 and 2006.

Since 1994, when human services received 23 percent of all grant dollars at the state and national levels, Minnesota has devoted a greater portion of grant dollars to this major field than the national average. In 2007, the share of human services grantmaking nationally was about 15 percent, 9 percentage points less than in Minnesota (see Figure AH). Across the Midwest region, 17 percent of grant dollars go to human services, 7 percentage points less than in Minnesota.

Human Services Grantmaking by Grantmaker Type

Within the Giving in Minnesota sample, private foundations continued to provide the largest share of funding for human services; however, giving by all grantmaker types to this field increased significantly in 2007 (see Table 23 and Figure AI).

In Minnesota:

- Private foundations provided \$103.5 million to human services, 46 percent of the giving to this subject area. In 2007, giving to human services by private foundations grew 14 percent, following a 9 percent decline from 2005 to 2006. Two private foundations accounted for the majority of the 2007 increase: The Fred C. and Katherine B. Andersen Foundation gave two large capital grants in 2007 – one of \$4 million to Presbyterian Homes and another of \$2.26 million to Boy Scouts of America. And the Northwest Area Foundation provided grants totaling \$8.86 million to their partnership organizations for poverty reduction and capacity building.
- Corporate grantmakers gave \$77.3 million to human services in 2007 and captured a similar share of giving to this major field as in previous years – 35 percent. Growth in giving by corporate grantmakers has risen steadily – by 7 percent in 2006 and 15 percent in 2007. Much of the growth in 2007 is the result of increased giving to food safety and security programs by corporate grantmakers. The University of Minnesota's Global Food Safety Systems Initiative captured \$2.3 million in funding from Cargill Citizenship Fund and General Mills. Two other food safety programs in the U.S. captured an additional \$850,000 in funding from Cargill Citizenship Fund.
- Community/public foundations gave \$42 million to human services, a 19 percent share of the grant dollars to this major field, and a continuation of strong growth in giving by community/public foundations to human services. Community foundations increased their giving to human services by 40 percent in 2006 and 39 percent in 2007. Much of the 2007 increase was due to increased giving by two community foundations to two capital campaigns: The Minnesota Community Foundation increased its giving to the Warroad Care Center, to \$8.65 million from \$2.06 million in 2006. And The Saint Paul Foundation gave \$1.5 million to Common Bond Communities.

Human Services Grantmaking by Subcategory

The multipurpose human services subcategory, which includes funding for human service organizations, social and family services, and residential and custodial care, received the largest share of human services grant dollars, as in previous years (see Table 24 and Figure AJ). Forty-six percent of the human services dollars, or \$101.8 million, funded this area. Giving to this subcategory increased 26 percent from 2006.

Housing/shelter and youth development are the next largest subcategories within human services, capturing 15 and 14 percent of the grantmaking in this area, respectively. Grantmaking to housing declined by 8 percent between 2006 and 2007, owing to smaller grants paid out in 2007 by The McKnight Foundation to its housing partners – Family Housing Fund and Greater Minnesota Housing Fund. Youth development grew by 36 percent during this same time period, owing to two large grants: Target Foundation granted Tiger Woods Foundation \$2.75 million, while Fred C. and Katherine B. Andersen Foundation granted \$2.26 million to the Boy Scouts of America.

The following subcategories all received between 5 and 6 percent of the human services grant dollars: employment/jobs; food, agriculture, and nutrition; public protection; and recreation, leisure and sports. Although they received similar shares of funding in 2007, their rates of growth from 2006 to 2007 varied dramatically. Recreation declined by 10 percent. The remaining areas grew at the following rates: employment by 5 percent; public protection by 13 percent; and food, nutrition, and agriculture by 42 percent.

Public safety, disaster preparedness and relief is the smallest subcategory in human services. In 2007, this area received 3 percent of the grant dollars to human services, or \$7.5 million. This represented a 102 percent growth rate for this subcategory, however, largely due to increased giving related to three disasters that year: the collapse of the Interstate 35W bridge into the Mississippi River, flooding in Southeastern Minnesota, and the earthquake in China's Yunnan province.

Largest Human Services Grantmakers

Minnesota's five largest human services grantmakers in 2007 are listed below. These five grantmakers granted 38 percent of all dollars given to human services by the sample in 2007.

1.	The McKnight Foundation	\$25,687,758
2.	Target Foundation and Corporation	\$16,908,096
3.	Otto Bremer Foundation	\$14,943,450
4.	The Saint Paul Foundation	\$13,903,182
5.	Northwest Area Foundation	\$13,077,450

Top Human Services Grant Recipients

The top five recipients of Minnesota's human services grant dollars in 2007 received 12 percent of the sample's human services grant funds. They are:

1.	Warroad Care Center	\$8,650,000
2.	Family Housing Fund	\$5,227,000
3.	Greater Minnesota Housing Fund	\$5,100,000
4.	Presbyterian Homes of Minnesota	\$4,055,802
5.	Common Bond Communities	\$3,652,500

International Affairs

- At 2 percent, giving to international affairs was the smallest share of overall giving in 2007.
- Funding for international affairs grew 17 percent in Minnesota in 2007, making it one of the fastest growing areas among the eight major subject areas.
- Private foundations provide the majority of the support for international affairs, but giving by corporate grantmakers grew significantly in 2007.
- The five largest international affairs funders gave 73 percent of grant dollars to this issue area in 2007.

International affairs grants go to organizations that promote international understanding; provide international development and relief services; and address international human rights, peace and security, and other related issues.

Grants included in this category are coded by subject area, not geography; therefore, the geographic service area of international affairs grants may or may not be located outside the U.S. For example, a \$5,000 grant from The Minneapolis Foundation to the University of St. Thomas in St. Paul for two events and a series of films documenting genocide at the Genocide Intervention Network is coded to the international affairs subject area category. For more on grantmaking by geographic area, see page 51.

Trends in International Grantmaking

Grantmakers in Minnesota gave \$19.2 million to international affairs in 2007, up from \$16.3 million in 2006 (see Figure AK). Funding for this subject area grew 17 percent from 2006 to 2007, nearly twice the 9 percent rate of growth experienced by the sample as a whole, and making this one of the fastest growing fields in the Giving in Minnesota sample.

The share of grant dollars in the sample dedicated to international affairs was 2 percent, in line with 2006 and 2005, and making it the smallest category among the eight subject areas (see Table 12). Between 1992 and 2005, international affairs captured 1 percent of the grant dollars.

The 2-percent share of grant dollars in Minnesota going to international affairs in 2007 was lower than the national average of 5 percent, continuing a long-term trend (see Figure AL).

International Affairs Grantmaking by Grantmaker Type

In 2007, private foundations in Minnesota continued to provide the largest share of grant dollars to international affairs; however, giving by corporate grantmakers grew significantly from 2006 to 2007. Funding by community/public foundations declined slightly during this same period (see Table 25 and Figure AM).

In Minnesota:

- Private foundation giving to international affairs increased 13 percent, to \$11.6 million from \$10.3 million. This represents 61 percent of the giving to this issue area.
- Corporate grantmakers provided 13 percent of the grant dollars for international affairs, or \$2.5 million, an increase of 256 percent from 2006.
- Community/public foundations provided 26 percent of the grant dollars to this area, or \$5.1 million, a decline of 5 percent from 2006.

International Affairs Grantmaking by Subcategory

Consistent with previous years, the international development/relief services subcategory received by far the largest share (62 percent) of international affairs grant dollars (see Table 26 and Figure AN). Other - international affairs dollars received the second largest share (28 percent). This subcategory includes employee matching gifts to international affairs organizations and interdisciplinary international affairs grants.

All subcategories within international affairs experienced growth in 2007, but because overall funding for these subcategories is relatively small, slight increases have a large impact on growth rates.

Largest International Affairs Grantmakers

Minnesota's five largest international affairs grantmakers in 2007 provided 73 percent of the funding to international affairs by the sample in 2007. They are:

1. The McKnight Foundation	\$5,169,735
2. WEM Foundation	\$3,815,500
3. The Minneapolis Foundation	\$2,345,874
4. Lutheran Community Foundation	\$1,640,800
5. Cargill Foundation and Citizenship Fund	\$1,062,218

Top International Affairs Recipients

The top five recipients of Minnesota's international affairs grant dollars in 2007 received 44 percent of the sample's grant funds. They are:

1. Yale University	\$3,750,000
2. Peace House Foundation	\$1,712,000
3. Medical Center (Africa)	\$1,520,000
4. Mano a Mano Medical Resources	\$720,000
5. United Way International	\$695,053

Public Affairs/Society Benefit

- *Fifteen percent of the giving – or \$140.1 million – went to public affairs/society benefit.*
- *Funding for public affairs/society benefit in Minnesota decreased slightly, by 2 percent in 2007, making it the only area among the eight major fields to experience a decline.*
- *Corporate grantmakers provided the largest share of funds for public affairs/society benefit and were the only grantmaker type to increase giving to this area.*
- *The philanthropy & voluntarism subcategory continued to receive the largest share of grant dollars in this subject area.*

The public affairs/society benefit category covers grants to nonprofits involved in general civic, community and societal improvement projects. It consists of six subcategories: philanthropy and voluntarism; community improvement/capacity building; public affairs/society benefit: multipurpose; science and technology research; civil rights/social action; and social science research.

Research produced by the Foundation Center on national giving trends treats science and technology and social science research as major fields. MCF categorizes these two areas as subcategories within public affairs/society benefit, because they are comparatively small. In Minnesota, funding for science and technology research totaled \$11.2 million in 2007, while funding for social science research totaled approximately \$751,000.

Trends in Public Affairs/Society Benefit Grantmaking

While public affairs/society benefit is the third largest of the eight major subject areas, it is the only one that experienced decreased giving in 2007. Grantmaking to public affairs/society benefit totaled \$140.1 million in 2007, a slight decrease of 2 percent from the \$142.3 million given to this area in 2006 (see Table 12). Still, this represented 15 percent of the giving in Minnesota, the third largest subject area share.

The decrease in giving to this field is partly due to changes in the composition of the Giving in Minnesota sample. In 2007, the William M. and Nadine M. McGuire Family Foundation, a significant public affairs/society benefit grantmaker, was not part of the research sample.

Following a series of significant increases during the 1990s and small declines in the early 2000s, the total grants paid to public affairs/society benefit leveled off and has remained relatively constant since 2002 (see Figure AO). As a share of overall giving, public affairs/society benefit has decreased in each of the last three years (see Table 12).

Between 1999 and 2006 Minnesota grantmakers typically gave a larger share of their grant dollars to public affairs/society benefit than did national grantmakers (see Figure AP). In 2007, however, Minnesota and national grantmakers gave a similar share of grant dollars – 15 percent – to this subject area.

Public Affairs/Society Benefit Funding by Grantmaker Type

Within the Giving in Minnesota sample, corporate grantmakers provided the largest amount of funding for public affairs/society benefit; they were also the only grantmaker type to increase giving to this area. Since 2005, total dollars (and shares) given by private foundations have steadily decreased, while total dollars and shares given by corporate grantmakers have steadily increased (see Table 27 and Figure AQ).

In Minnesota:

- Corporate grantmakers provided \$67.9 million to public affairs/society benefit and, at 48 percent, were the largest contributor to this issue area. After significant growth in giving between 2005 and 2006 – a 27 percent increase – corporate grantmakers gave 4 percent more in 2007.
- Private foundations provided \$55.5 million to public affairs/society benefit, 40 percent of the giving to this subject area. In 2007, giving to public affairs/society benefit by private foundations decreased 6 percent.
- Community/public foundations gave \$16.7 million to public affairs/society benefit, a 4 percent decrease from 2006. This represents a 12 percent share of giving to this subject area.

Public Affairs/Society Benefit Trends by Subcategory

Consistent with previous years, the philanthropy & voluntarism subcategory received the largest share of public affairs grant dollars (see Table 28 and Figure AR). This subcategory captured 44 percent of the grant dollars, or \$62.1 million in 2007. The majority of the funds to direct services in this area – 60 percent – were devoted to community funds and federated giving programs, followed by contributions to public foundations (28 percent of the funds) (see Appendix x).

Community improvement/capacity building is the second largest subcategory in this issue area – receiving \$44.3 million, or 32 percent of the grant dollars. Giving to this subcategory declined 14 percent between 2006 and 2007. The greatest share of funds within this subcategory go to economic development (36 percent), followed by community/neighborhood development (24 percent) (see Appendix x).

Multipurpose public affairs received \$16.7 million of the overall public affairs/society benefit dollars, or 12 percent. This represents a decline of 6 percent from 2006. The greatest share of funds within this subcategory went to leadership development (40 percent) and government/public administration (23 percent), which includes funding for citizen engagement projects and policy work.

Finally, although grantmaking to civil rights is a comparatively small part of overall giving in the public affairs issue area, it grew rapidly – to \$5 million in 2007 from \$3.5 million in 2006. The majority of the funds (84 percent) in this issue area were dedicated to civil rights advocacy for specific groups (see Appendix x).

Largest Public Affairs/Society Benefit Grantmakers

Minnesota's five largest public affairs/society benefit grantmakers in 2007 provided 38 percent of the funding to this subject area. They are:

- | | |
|---|--------------|
| 1. The McKnight Foundation | \$20,075,620 |
| 2. Shakopee Mdewakanton Sioux Community | \$10,373,000 |
| 3. Otto Bremer Foundation | \$8,083,572 |
| 4. Target Foundation and Corporation | \$7,830,843 |
| 5. Northwest Area Foundation | \$7,090,597 |

Public Affairs/Society Benefit Recipients

The top five recipients of Minnesota's public affairs/society benefit grant dollars in 2007 received 22 percent of the sample's grant funds for this subject area. They are:

- | | |
|---|--------------|
| 1. Greater Twin Cities United Way | \$20,771,046 |
| 2. The Saint Paul Foundation | \$3,347,044 |
| 3. Southern Minnesota Initiative Foundation | \$2,447,487 |
| 4. Northland Foundation | \$2,068,120 |
| 5. Partnership to End Poverty (Oregon) | \$2,000,000 |

Religion

- *Three percent of the giving – \$31.2 million – went to religion in 2007.*
- *Funding for religion in Minnesota grew 12 percent in 2007, faster than the 9-percent growth rate of the sample as a whole.*
- *Funding for religion has long been a slightly larger portion of overall giving in Minnesota than nationally; 2007 was no exception.*
- *Community/public foundations continued to provide the most funds for religion, due in part to giving via donor-advised funds.*

The Religion category includes grants to worship and faith-based organizations, such as churches, synagogues and religious associations.

Trends in Religion Grantmaking

Grantmakers in Minnesota gave \$31.2 million to religion in 2007, up from \$27.7 million in 2006 (see Table 12 and Figure AS). Funding for this subject area grew 12 percent from 2006 to 2007, faster than the 9 percent growth rate of the sample as a whole. The share of grant dollars in the sample dedicated to religion was 3 percent in 2007, in line with 2005 and 2006.

Minnesota grantmakers have historically given a higher share of their grant dollars to religion than have national grantmakers. Between 1994 and 2007, grantmakers in the state gave more than national grantmakers to religion in every year but 2005 (see Figure AT). In 2007, Minnesota grantmakers gave a 3-percent share of grant dollars to religion, while national grantmakers gave a 2-percent share to this major field.

Religion Funding by Grantmaker Type

For the fifth year in a row, community/public foundations provided the largest share of religion grant dollars, followed by corporate foundations and giving programs. All grantmaker types experienced growth in giving to religion between 2006 and 2007 (see Table 29 and Figure AU).

In Minnesota:

- Community/public foundations' giving to religion increased 10 percent, to \$14.9 million in 2007 from \$13.6 million in 2006. This represents 48 percent of the giving to this subject area. Community/public foundations' relatively high level of religion grantmaking is due in part to giving from donor-advised funds. A survey conducted by Independent Sector in 2001 found that individual donors give more to religion than any other area, and many do so through donor-advised funds at community/public foundations.
- Corporate foundations provided 30 percent of the grant dollars for religion, or \$9.2 million, an increase of 13 percent from 2006.

- Private foundations provided 23 percent of the grant dollars for religion, or \$7.1 million, an increase of 18 percent from 2006.

Trends in Religion Grantmaking by Subcategory

Consistent with previous years, the Christian subcategory received the largest share of religion grant dollars, at 76 percent, or \$23.7 million (see Table 30 and Figure AV). This represented a 7 percent increase from 2006.

Grantmaking to the Jewish subcategory continued to decrease – by 7 percent in 2007, following a 55 percent decrease in 2006. In 2006, this change was primarily due to changes in the Giving in Minnesota sample, as the grantmakers that gave primarily to this subcategory were not among the 100 largest grantmakers in the research sample.

The Buddhist, Hindu and Islamic subcategories each received less than a 1 percent share of grant dollars to this subject area.

Grantmaking to interfaith organizations and the other religion subcategory, which includes employee matching grants, fundraising by religious organizations for their operations, and interdisciplinary religious programs, experienced significant growth in 2007 – 73 percent and 50 percent, respectively. Because total giving to each of these areas is comparatively small, a modest increase in giving appears as a significant change in the growth rate.

Largest Religion Grantmakers

Minnesota's five largest religion grantmakers in 2007 provided 59 percent of the funding. They are:

1. Thrivent Financial for Lutherans Foundation and Corporation	\$7,982,026
2. The Saint Paul Foundation	\$3,102,821
3. Lutheran Community Foundation	\$3,081,850
4. The Minneapolis Foundation	\$2,708,507
5. Catholic Community Foundation in the Archdiocese of Saint Paul and Minneapolis	\$1,633,538

Religion Grant Recipients

The top five recipients of Minnesota's religion grant dollars in 2007 received 22 percent of the grant funds. They are:

1. Evangelical Lutheran Church in America (Illinois)	\$1,877,556
2. Minneapolis Jewish Federation	\$1,508,500
3. The Lutheran Church – Missouri Synod (Missouri)	\$1,425,000
4. Archdiocese of Saint Paul and Minneapolis	\$1,325,297
5. Greater Minneapolis Council of Churches	\$716,899

Grantmaking by Geographic Service Area

The following section describes the geographic trends in grantmaking by the Giving in Minnesota sample of 100 of the largest grantmakers in the state by grants paid. For this analysis, MCF coded grants based on the geographic areas served by the recipient organizations. Each geographic area is distinct and no grant is coded to more than one area.

The geographic service areas and their definitions follow:

- **Twin Cities metropolitan area:** grants made to a program or organization that serves one or more counties in the 7-county metro area, including Anoka, Carver, Hennepin, Ramsey, Washington, Scott and Dakota counties.
- **Greater Minnesota:** grants made to a program or organization that serves a specific city, county, or region within Minnesota other than the Twin Cities metro area but does not serve the entire state.
- **Minnesota statewide:** grants made to a program or organization that serves the entire state of Minnesota.
- **Areas outside Minnesota:** grants made to a program or organization that serves a state (excluding Minnesota) or group of states, but the organization does not serve or represent the entire nation.
- **National:** grants made to a program or organization that serves the entire nation. This includes national organizations that are headquartered in Minnesota.
- **International:** grants made to a program or organization that serves an area outside the United States.

Trends in Giving by Geographic Service Area

In 2007, grantmakers in the Giving in Minnesota sample gave 55 percent of their grant dollars, or \$499.8 million, to organizations serving Minnesota, similar to 2006 levels (see Table 32). The Twin Cities metro area received 32 percent of total grant dollars, or \$296.3 million; Greater Minnesota received 12 percent, or \$106 million; and Minnesota statewide received 11 percent, or \$97.5 million (see Figure AW).

Giving within Minnesota:

- Giving to Greater Minnesota grew fastest among all geographic areas, at 18 percent growth in 2007 since 2006, and bringing giving close to 2004 levels. Between 2004 and 2005, giving to Greater Minnesota experienced a decline of 26 percent, largely due to the one-time grant to Grand Itasca Hospital from Blandin Foundation in 2004, which was not repeated in 2005.
- Giving to the Twin Cities metro area grew 10 percent in 2007.
- Giving to the Minnesota statewide category grew 5 percent.

Giving outside Minnesota:

- Giving to organizations that serve areas outside Minnesota (defined as a state or group of states, but not the entire nation), increased by 12 percent from 2006, and captured 30 percent of the grant dollars – \$271.8 million – in 2007.
- Giving to organizations with a national service area decreased by 2 percent in 2007, to \$113 million, after significant growth of 48 percent from 2005 to 2006.
- Finally, giving to organizations with service areas outside the U.S. grew by 6 percent, to \$33.3 million.

Geographic Distribution by Grantmaker Type

Consistent with previous years, in 2007 community/public foundations and private foundations gave the largest share of their grant dollars to organizations serving Minnesota, with the largest portion of those funds going to organizations that serve the Twin Cities metro area (see Table 33 and Figure AX).

The share of community/public foundation grant dollars going to organizations that serve Minnesota increased in 2007 to 77 percent from 74 percent in 2006. Contributing to the overall growth was a 4-percentage-point increase in giving by community/public foundations to organizations serving Greater Minnesota.

Private foundations increased their share of grant dollars to organizations serving Minnesota by 1 percentage point to 66 percent in 2007. They shifted their grant dollars slightly within the state, however, increasing their share of giving to organizations serving the Twin Cities and decreasing slightly their share of giving to organizations serving Minnesota statewide.

Corporate foundations and giving programs gave the largest share of their grant dollars to organizations serving areas outside Minnesota (39 percent). Corporations based in Minnesota often divide their grantmaking between headquarters communities and other regions of the country or world where their customers, plants and/or offices are located. Organizations that serve the Twin Cities and organizations with a national service area captured the second largest shares of corporate grant dollars, at 23 percent each.

Corporate grantmakers continued to give slightly smaller shares of their grant dollars to all Minnesota service areas combined, declining to 34 percent in 2007, from 36 percent in 2006, and from 40 percent in 2005. The decrease in corporate funders' share of giving to the state was spread across the Twin Cities and statewide in 2007; corporate funding to organizations that serve Greater Minnesota grew by 1 percentage point.

Grantmaking by Intended Beneficiary

This section is an analysis of trends in grantmaking by intended beneficiary for the Giving in Minnesota sample of 100 of the largest grantmakers in Minnesota. In addition to classifying grants using the NTEE system to identify subject areas, MCF applies the Foundation Center's supplemental Grants Classification System (GCS) codes (see Methodology, page 61) to identify major beneficiary groups (see Table 34), as well as types of support (see Table 36).

Grants are coded only to specific populations/groups when the intended beneficiary is clearly articulated in the grant description or is clear from the name and purpose of the recipient organization. Because many grants lack a detailed description of their purpose, the amount of funding reported here is likely to under-represent the amount of support grantmakers in Minnesota intend to benefit specific population groups.

In cases where more than one beneficiary group is indicated in the grant description, the grant is coded for multiple intended beneficiaries. For example, a grant intended to benefit African-American women will be coded for African Americans/blacks as well as for women and girls. MCF codes up to a maximum of three beneficiaries per grant. The majority of grants are not coded to more than one beneficiary; in 2007, only 3 percent of all grants in the sample were coded to multiple beneficiaries.

It is important to note that among the grants not coded for specific populations/groups are those that provide general support to institutions or programs that serve broad public interests (including, for example, community centers), and elementary and secondary schools, college scholarships and general recreational agencies (e.g., YMCAs).

Based on the criteria above, just over half (53 percent) of the 2007 grants in the Giving in Minnesota sample could be coded to a specific beneficiary group other than general public/unspecified.

Grantmaking Trends by Intended Beneficiary

Giving to programs serving the general public/unspecified beneficiary group received the largest share of grant dollars in 2007, at 47 percent (see Table 34).

In 2007, grantmakers gave the largest shares of their grant dollars to organizations that serve the following five beneficiary groups (excluding the general public category):

- Children and youth (22.2 percent, or \$209.4 million)
- Adults (9.2 percent, or \$86.8 million)
- Poor or economically disadvantaged (4.8 percent, or \$45.5 million)
- Native Americans/American Indians (3.3 percent, or \$31.3 million)
- Other named groups⁸ (3.2 percent, or \$30 million)

⁸ This category includes groups that are named in grant descriptions, such as artists, teachers, disaster victims, etc., but for which there is no specific category in the GCS codes.

In 2006, giving to organizations that serve the same groups listed above also received the largest shares of grant dollars.

Grantmaking by the sample to programs serving the following three beneficiary groups experienced significant growth in 2007, as compared to 2006: military/veterans; poor/economically disadvantaged; and aging/elderly/senior citizens.

- Giving to programs serving the military/veterans grew 266 percent, to \$1.6 million, from \$426,000. It is important to note that because overall giving to this beneficiary group is comparatively small, changes in giving appear as large percentage increases.
- Giving to programs serving the poor/economically disadvantaged grew 57 percent, to \$45.5 million, from \$28.9 million in 2006. Grants from The Saint Paul Foundation to Common Bond Communities for their capital campaign and from Northwest Area Foundation to its partnership organizations for poverty reduction and capacity building account for the majority of the change.
- Giving to programs serving the aging/elderly/senior citizens grew 50 percent, to \$18.6 million, from \$12.3 million in 2006. Capital grants from the Minnesota Community Foundation for Warroad Care Center and from Fred C. and Katherine B. Andersen Foundation to Presbyterian Homes accounted for the majority of the change.

Grantmaking to programs serving the following five beneficiary groups experienced notable declines in 2007: migrant workers, single parents, people with HIV/AIDS, crime/abuse victims, and ethnic/racial minorities - other specified groups.

- No grant dollars in the 2007 sample were devoted to organizations that serve migrant workers and single parents. As such, those beneficiary groups experienced 100 percent decreases in giving. It is important to note that in 2006, overall giving to organizations that serve each of these groups was very small – \$212,000 to migrant workers and \$38,000 to single parents.
- Following a 25 percent increase in 2006, grantmaking to organizations serving people with HIV/AIDS declined by 39 percent in 2007 to \$745,000.
- Grantmaking to organizations serving crime/abuse victims experienced a decline of 34 percent in 2007, also following a major increase in 2006 (260 percent), when The McKnight Foundation granted \$1 million to the state of Minnesota for a pilot program aimed at reducing child maltreatment.

-
- Grantmaking to organizations that serve ethnic and racial minorities - other specified groups has experienced a steady downward trend since 2005, decreasing by 27 percent in 2006 and 30 percent in 2007. This category includes grants going to Jewish programs or organizations. The decline in 2007 is due in part to changes in the research sample. The Harry Kay Charitable Foundation and the Sabes Family Foundation, which accounted for \$3 million in grantmaking in 2006 to Jewish programs, were not in the research sample in 2007.

Intended Beneficiary Trends by Grantmaker Type

Among all three grantmaker types – corporate, private, and community/public – each gave the largest shares of their grant dollars to organizations serving three beneficiary groups – general public, children and youth, and adults, mirroring the trend in the sample overall (see Table 35).

In 2007, as in 2006, corporate grantmakers gave the largest shares of their grant dollars to organizations that serve the following five beneficiary groups (excluding the general public category):

- Children and youth (32.6 percent, or \$130.1 million)
- Adults (5.9 percent, or \$23.6 million)
- Native Americans/American Indians (4.9 percent, or \$19.5 million)
- Poor/economically disadvantaged (3.2 percent, or \$12.9 million)
- Other named groups (2.6 percent, or \$10.4 million)

In 2007, private foundations gave the largest shares of their grant dollars to organizations that serve the following five beneficiary groups (excluding the general public):

- Children and youth (14.3 percent, or \$57.7 million)
- Adults (12.9 percent, or \$51.8 million)
- Poor/economically disadvantaged (6.4 percent, or \$25.9 million)
- Other named groups (3.4 percent, or \$13.5 million)
- Native Americans/American Indians (2.6 percent, or \$10.5 million)

In 2006, giving by private foundations to organizations serving Native Americans/American Indians was not among the top 5; giving to women and girls was.

In 2007, community/public foundations gave the largest shares of their grant dollars to organizations that serve the following five beneficiary groups (excluding the general public):

- Children and youth (15.4 percent, or \$21.6 million)
- Adults (8.1 percent, or \$11.4 million)
- Aging/elderly/senior citizens (7.5 percent, or \$10.6 million)
- Poor/economically disadvantaged (4.8 percent, or \$6.7 million)
- Other named groups (4.3 percent, or \$6.1 million)

In 2006, organizations serving these same five beneficiary groups also received the largest shares of community/public grant dollars, but ranked in slightly different order.

Based on grants of \$2,000 or more made by a sample of 100 of the largest grantmakers in Minnesota

Source: Minnesota Council on Foundations, *Giving in Minnesota, 2009 Edition*.

Grantmaking by Support Type

This section describes trends and patterns in grantmaking by support type for the Giving in Minnesota sample of 100 of the largest grantmakers in the state by grants paid. MCF applies the Foundation Center's Grants Classification System (GCS) to code support type across five broad categories and 39 subcategories. MCF only codes support types that are articulated clearly in the grant description. In 2007, foundations reported more complete data on their giving by support type than in 2006. As a result, MCF was able to code 89 percent of the Giving in Minnesota sample's grants by support type in 2007.

Grantmaking Trends by Support Type

Minnesota grantmakers continued to devote the largest share of their grant dollars – 55.3 percent, or \$453.7 million – to program support. This share is similar to that devoted to program support in 2006 (see Table 36).

The share of grant dollars for general support continued to decline in 2007, to 20.9 percent. Shares of giving to this category have declined every year since 2004, when they were at 29 percent. Most of the decline has been in the general/operating support subcategory.

Giving for capital support grew in 2007 to 14.9 percent, or \$122.3 million, from \$89.6 million in 2006.

Support Type Funding by Grantmaker Type

In 2007, all grantmaker types – private, community/public and corporate – gave their largest share of grant dollars to fund program support, followed by general support and capital support (see Table 37).

In 2007, private foundations provided the following types of support:

- Giving to program support increased slightly, to \$199.4 million.
- Giving to general support increased to \$82.2 million from \$70.9 million in 2006.
- Giving to capital support increased to \$63.4 million from \$53.9 million in 2006. About 11 percent went to capital campaigns, 2.5 percent to endowment funds, and 2 percent to building/renovation.
- Giving to student aid decreased slightly in 2007, to \$22.5 million, as did the share, to 6 from 7 percent.
- Giving to other was about the same in 2007 as 2006 – \$7.7 million or a 2.1 percent share of private grant dollars. The majority of the funds in this category went to research and program evaluation.

In 2007, corporate grantmakers provided the following types of support:

- Giving to program support increased slightly, to \$202.8 million, but the share of funding remained the same year-over-year.
- Giving to general support declined slightly, to \$55.2 million, as did the share of funding – 17 percent. About 11 percent was devoted to the general operating support subcategory, while 6 percent was devoted to annual campaigns.
- Giving to capital support increased to \$33.9 million, a 10 percent share.
- Giving to student aid and the share of funds for student aid both increased slightly – to \$14.5 million, or 4.5 percent of the share corporate grant dollars.
- Giving to other increased – to \$18.9 million from \$13.2 million the previous year. This was largely due to an increase in employee matching gifts, as well as increased giving to research.

In 2007, community/public foundations provided the following types of support:

- Program support increased to \$51.5 million in 2007 from \$25.8 million in 2006, capturing 43 percent of the share of grant dollars given by community/public.
- Grant dollars to general support increased, to \$33.8 million from \$25.8 million in 2006; the share of dollars devoted to general support was 28 percent.
- Both dollars and shares for capital support increased to \$25 million in 2007 from \$7.3 million in 2006, representing 21 percent of the share of community/public grant dollars.
- Funds for student aid support increased to \$7.5 million, or 6.2 percent of the share of community/public funds.
- Both dollars and shares for other decreased significantly, to \$2.3 million, or 2 percent of the share of community/public funds, from \$5.0 million in 2006, or 7.2 percent. This change was largely due to a decrease in funding for research.

Methodology

Data collection for Giving in Minnesota is a year-round process that involves multiple sources of information about grantmakers and grants in Minnesota and across the U.S. Data on the grants made by 100 of the largest grantmakers located in Minnesota for which MCF can obtain information (the Giving in Minnesota sample) are coded, based on the best available information provided by grantmakers, using the National Taxonomy of Exempt Entities (NTEE) and the Grants Classification System (GCS). These two coding systems allow for categorization of grants by subject area, geographic service area, intended beneficiary, and support type.

Sources of Information

Information on overall Giving in Minnesota and on giving by 100 of the largest grantmakers in the state comes from the following sources:

- Self-reporting by grantmakers to MCF on grants paid, assets and grant description. Sources include financial information provided to MCF for the Annual Rankings of the largest grantmakers in Minnesota; grants lists provided by the largest grantmakers; annual reports; and Minnesota Grantmakers Online (MGO), MCF's database of Minnesota grantmakers and grants.
- Annual 990 tax return forms filed by community/public foundations and 990-PF forms filed by private foundations and company-sponsored foundations, which report total grants, total assets and grant lists at the end of the organization's filing year. Sources include Minnesota Attorney General's Charity Search database and GuideStar's and the Foundation Center's 990 Finders.

Information on individual giving comes from the Internal Revenue Service's Statistics of Income, Individual Income and Tax Data, by State And Size of Adjusted Gross Income, for Tax Year 2007, which reports in aggregate on the 906,845 tax returns with charitable deductions filed in Minnesota for that year.

Information on the percentage of charitable givers in the United States who itemize their tax returns comes from *Giving USA*, a publication of Giving USA Foundation, researched and written by the Center on Philanthropy at Indiana University (2008 edition).

Information on national and international giving trends comes from *Foundation Yearbook: Facts and Figures on Private and Community Foundations, 2009 Edition*, published by the Foundation Center.

Information on individual donations to religion comes from *Giving and Volunteering in the United States 2001: Findings from a National Survey, Independent Sector*

Information on grant dollars flowing into Minnesota from non-Minnesota-based foundations comes from the Foundation Center's 2009 research data set used for *Foundation Giving Trends: Update on Funding Priorities, 2009 Edition*.

Sample

In order to provide detailed information on trends in Giving in Minnesota, MCF analyzes the giving of 100 of the largest grantmakers located in the state, by grants paid, for which MCF can obtain information. The 100 grantmakers in the sample in 2007 include 50 private foundations, 34 corporate foundations and giving programs, and 16 community/public foundations (see Appendix i).

The sampling base for *Giving in Minnesota, 2009 Edition* includes 27,243 grants of \$2,000 or more awarded by the 100 grantmakers in the sample. These grants totaled \$917.9 million, represented 85 percent of the total giving of the top 100⁹, and 70 percent of all grantmaking in the state. Eighty-five percent of the grantmakers in this year's sample also appeared in last year's sample.

In reports prior to Giving in Minnesota, 2007 edition (which covered grantmaking in 2005), all grantmakers that awarded \$1 million or more in grants were included in the sample for analysis. In 2007, the criteria were changed to include the top 100 grantmakers in Minnesota, in order to keep the number of grantmakers in the sample consistent across years. Information presented in this report for 2003 and 2004 was recalculated to reflect only the 100 largest grantmakers for those years (and thus the 2003 and 2004 information differs from that presented in reports before the 2007 edition of Giving in Minnesota).

⁹ Total giving by 100 of the largest grantmakers in the state was \$1.1 billion in 2007..

Grant Coding

MCF applies two coding systems to the grants of \$2,000 and above made by 100 of the largest grantmakers in the state: the National Taxonomy of Exempt Entities (NTEE) coding system, which was developed by the National Center for Charitable Statistics (NCCS) in 1987, and the Grants Classification System (GCS), which was developed by the Foundation Center in the late 1980s.

The NTEE is used widely by the IRS, as well as philanthropy research organizations, such as the Foundation Center, to classify nonprofit organization activities. The system classifies 26 major subcategories (A-Z) (see Appendix x) under 10 basic subject areas (see Table 38). The 26 subcategories include additional subfields for services, disciplines or types of institutions unique to that field.

For coding, in cases where an organization may have more than one purpose, the code is limited to the one listed first on a nonprofit's IRS Form 990. MCF codes each grant by the grant description's subject purpose, when available. When no grant description is provided, the grant is coded based on the recipient organization's primary purpose.

To further analyze trends by intended beneficiaries and support type, MCF applies supplemental Grants Classification System (GCS) codes to grants in the sample. These codes have been developed and maintained by the Foundation Center. This additional coding allows MCF to analyze of grantmaking to beneficiary groups (see Table 39) and by type of support (see Table 36). The detailed beneficiary group codes in Table 39 are collapsed for reporting purposes into Table 34.

Time Period

To ensure consistency in the Giving in Minnesota report, MCF analyzes data that cover the same time period each year. The 2009 report describes Minnesota grantmaking trends for the year 2007, which MCF defines as the fiscal year of any Minnesota foundation or corporate giving program that ends between June 1, 2007 and May 31, 2008. Grants reported on during this time period may have been made anytime between June 1, 2006, and May 31, 2008, depending on the grantor's fiscal year.

The grant dollar amounts reported for the Giving in Minnesota sample reflect total grant dollars paid during a single year.

Limitations

The sample trends presented in Giving in Minnesota are meant to suggest grantmaking patterns in Minnesota. Although giving by the sample represents a large portion of Minnesota's grant dollars, it is not a comprehensive picture of all giving in the state. Grants of less than \$2,000 have been excluded, as have all grants made by smaller foundations, grants made directly to individuals, and grants made by private operating foundations.

Some of the data sources have certain limitations:

- The annual 990 and 990-PF tax returns often provide minimal information about grants and grant recipients. In particular, these tax returns may lack detailed programmatic descriptions, including the purpose of the grant, the address or geographic service area of grant recipients, the type of support provided (operating vs. programmatic, etc.), and the intended beneficiary of the grant. While MCF's staff attempts to locate this information online, it is often difficult or impossible to obtain. As a result, the data obtained from tax returns are, in general, not as complete as the data provided to MCF through self-reporting.
- The level of detail and specificity in self-reported data varies across grantmakers, depending on what they choose to provide. In general, self-reported data tends to be more complete than that found on tax returns.
- The data on individual giving in Minnesota are estimated based on information found in *Giving USA* (2008 edition) and data from the IRS; not all individuals who make charitable contributions itemize their tax returns.
- Information from corporate giving programs is voluntarily self-reported to MCF; a corporation is only required to report to the IRS contributions made through a corporate foundation (if it has one).

Table 38 National Taxonomy of Exempt Entities (NTEE)

Subject Area	Major Groups Included
Arts, Culture & Humanities	A
Education	B
Environment/Animals	C, D
Health	E, F, G, H
Human Services	I, J, K, L, M, N, O, P
International Affairs	Q
Public Affairs/Society Benefit	R, S, T, U, V, W
Religion	X
Mutual Membership	Y
Unknown/Unclassified	Z

Table 39 Grants Classification System (GCS) Beneficiary Group Codes

Code	Description
A0	Not specified/general public (grants/organizations that could benefit everyone, not a specific population)
A1, A2, A3, A4	Infants/toddlers, children/youth, children, youth
A5	Adults
A6	Aging
A7	Young adults
D0	Disabilities, people with
D1	Physically disabled
D2	Blind/visually impaired
D3	Deaf/hearing impaired
D4	Mentally disabled
E0	Minorities (grants/organizations that are described as working with ethnic/racial populations, but not a specific group)
E1	Asians/Pacific Islanders
E2	African Americans/Blacks
E3	Hispanics/Latinos
E4	Native Americans/American Indians
E5	Indigenous people
E9	Other racial, ethnic minorities
F0	Women
F1	Infants/toddlers, female
F2, F3, F4	Girls
F5	Adults, women
F6	Aging, female
F7	Young adults, female
M0	Men
M1	Infants/toddlers, male
M2, M3, M4	Boys
M5	Adults, men
M6	Aging, male
M7	Young adults, male
N0	Other named groups (groups that have a commonality that isn't linked to ethnic/racial or minority status)
N1	Military/veterans
N2	Offenders/ex-offenders
N3	Substance abusers
N4	AIDS, people with
N5	Single parents
N6	Crime/abuse victims
N7	Terminal illness, people with
O0	Minorities (groups that are linked through minority status that isn't linked to ethnic/racial)
O1	LGBTQ
O2	Immigrants/refugees
P0	Economically disadvantaged
P1	Homeless
P2	Migrant workers

Appendices

Appendix i: *Giving in Minnesota* Sample

The analysis described in the *Giving in Minnesota* Sample Trends of this report is based primarily on a detailed analysis of the 2007 grantmaking activity of the following 100 Minnesota grantmakers. The list of grantmakers used for last year's report is also included as a reference.

Appendix x: Subject Area Summaries, 2007

About These Summaries

The tables on the following pages provide detail about grants paid within each of the 26 major subject area categories, and breakdowns by subcategories within each category, based on the National Taxonomy of Exempt Entities (NTEE) (see Methodology section).

For each major category, direct service and non-direct service are distinguished. Direct service organizations provided services directly to individual people as clients. Non-direct service organizations are organizations whose services are not provided directly to individuals but rather to groups, such as associations, research centers and policy groups.

Major Field Area	NTEE Category Included
Arts, Culture & Humanities	A
